Nice, but it's a little bit hard at more advanced levels, and sometimes i ragequit :DD. Brain get bobo 8V10 cans of Monster. My Brain hurts.... Ripple is a fun and challaging logic puzzle game. While the concept may not be particuly new i believe that the game does it well with a simplistic yet lovely art style.. Pros:

- Trading Cards
- Cheap
- Controls are good for a puzzle game
- Cool as a screensaver with nice color scheme

Cons:

- Gameplay feels very generic
- You'll get bored of playing it after around 15 levels (there's 50 of them)
- Some puzzles too easy, or too hard. NO GUIDE ON YOUTUBE <:(
- Achievements are way too sarcastic (there is literally an achievement called "I'm Loving This"... *sarcasm*)
- Doesn't bring anything new to the table

Recommended for:

People who just want to create badges, or collect some trading cards, only when the game is on sale. Anyone else should skip it and play better games instead.

NOTES:

I got this game for 66% off via a coupon for creating a badge, and i think it's worth only that.
